Eduroam Configuration Instructions

Eduroam (education roaming) is a secure, world-wide roaming access service developed for the international research and education community. It provides researchers, teachers and students easy and secure network access when visiting another eduroam member institution other than their own.

How to Connect to Eduroam Wireless Network

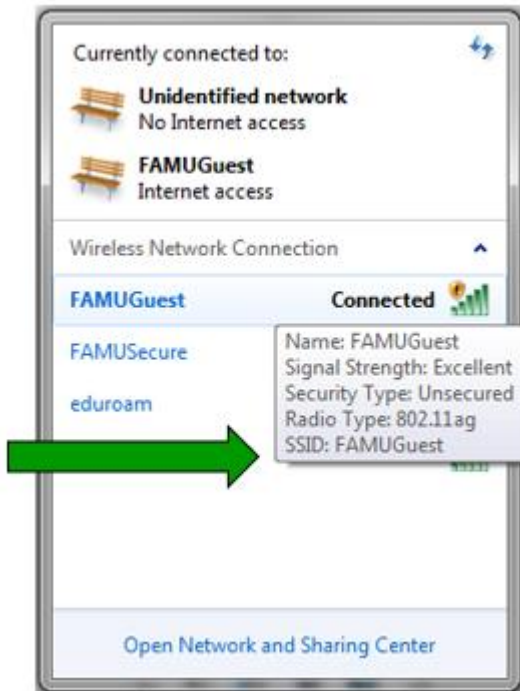

1. Right-click on the lower right hand corner of the screen to open the Wireless Network Connection Screen.

2. Select “FAMUGuest” and click Connect.

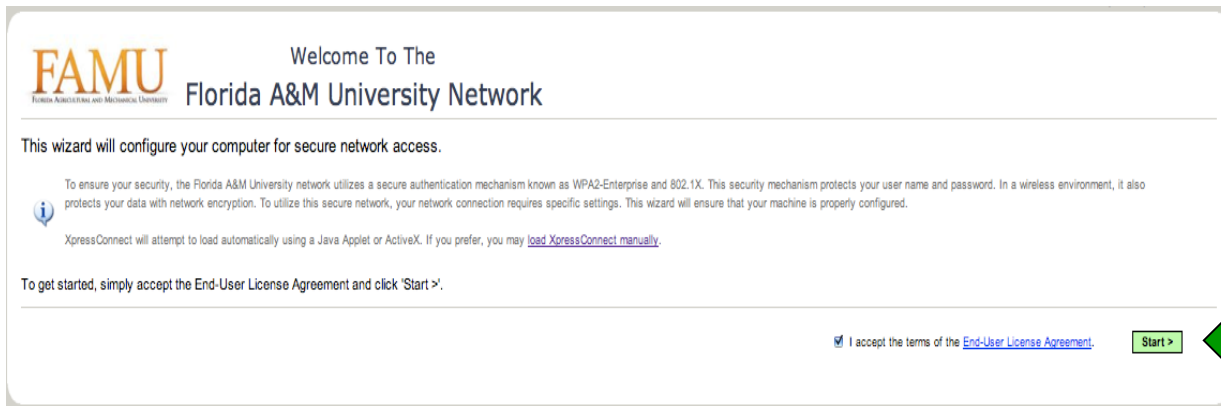

3. A limited connection is now established.

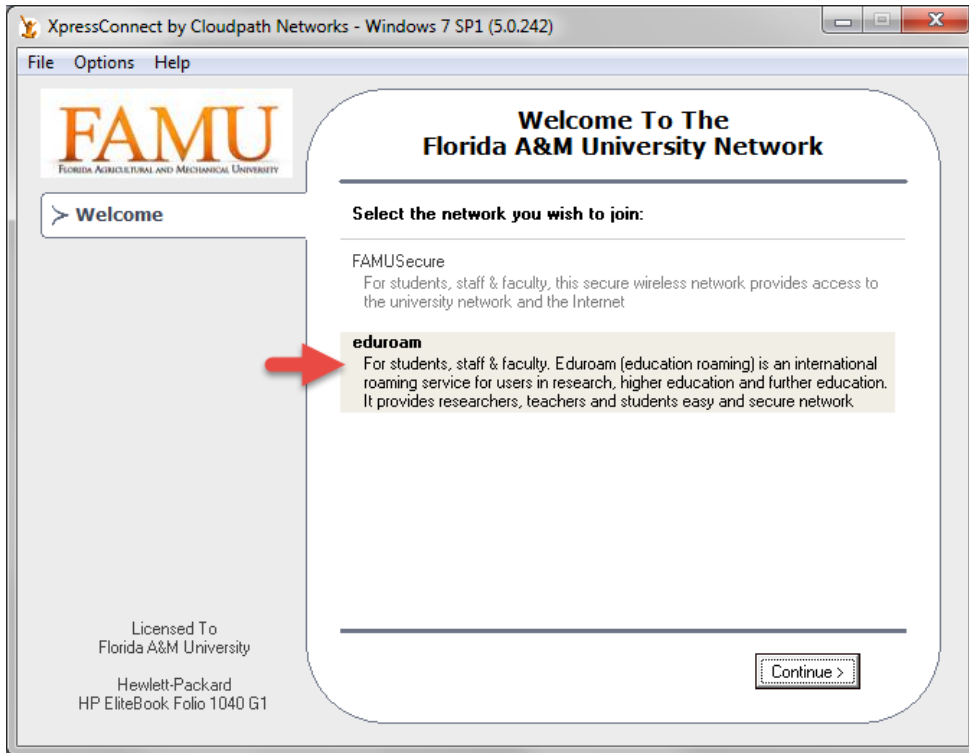

4. Open Internet Explorer, Firefox, Google Chrome, Safari etc, and click on the below link to start XpressConnect. Or copy and paste into a web browser the following: <http://connect.famu.edu/>

5. Click "I Accept of the terms of the End-User License Agreement" then click "Start"

6. Select the eduroam tab and click continue to configure your device for eduroam.

7. Enter eduroam or iRattler “Username” and “Password” press “Continue”

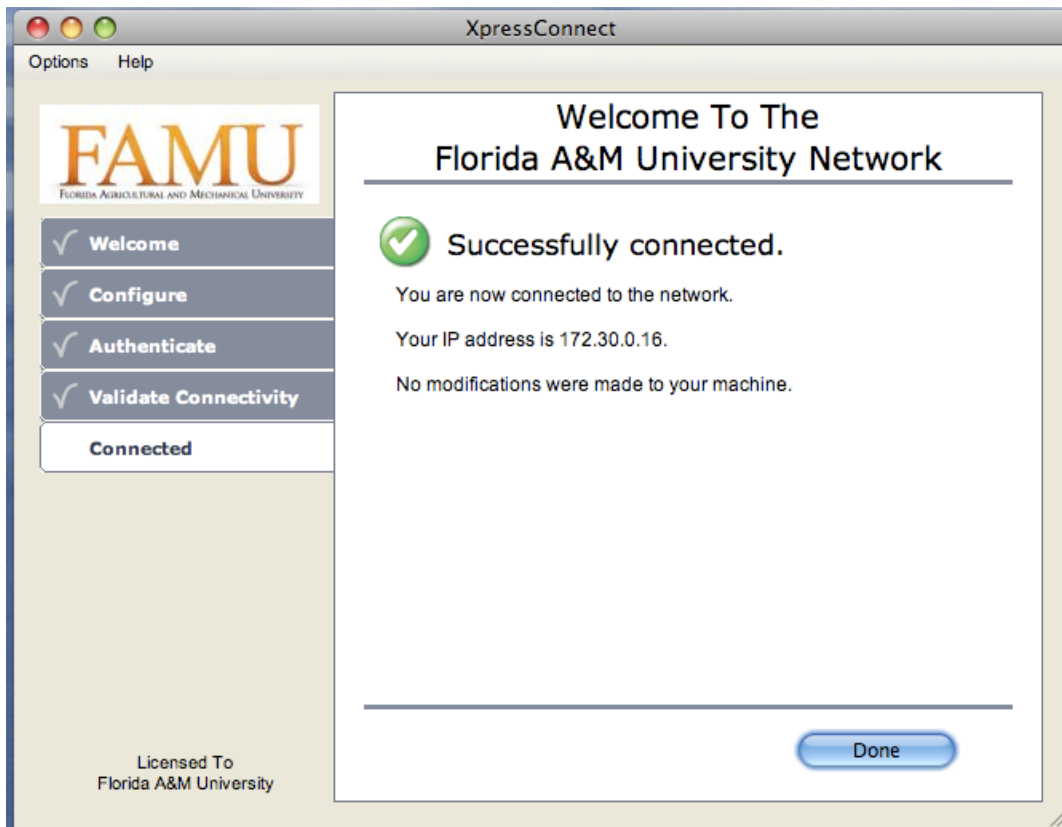

The screenshot shows a window titled "XpressConnect" with a menu bar containing "Options" and "Help". On the left side, there is a vertical navigation pane with the FAMU logo (Florida Agricultural and Mechanical University) at the top. Below the logo are five buttons: "Welcome", "Configure", "Authenticate", "Validate Connectivity", and "Connected". The main content area is titled "Welcome To The Florida A&M University Network" and contains the following text: "Enter your credentials for this network:", "Your FAMNET ID (e.g john.doe) and Password are required to access this network.", and two input fields. The first field is labeled "FAMNET ID (e.g j...)" and contains the text "michael.brown". The second field is labeled "Password:" and contains a series of dots. Below the input fields is a link that says "Forgot your password?". At the bottom of the main area are two buttons: "< Back" and "Continue >". In the bottom left corner of the window, it says "Licensed To Florida A&M University".

XpressConnect will go through several steps to determine your connectivity status. It may ask you, more than once, to enter your credentials, which is your FAMNETID and password. Each time you are prompted, enter your credentials in the appropriate boxes and then click continue.

The wizard requires elevated user account privileges to make configuration changes in your operating system. If requested, please supply your device's administrative username and password to continue.

On Windows computers, during the authentication step of the wizard, a bubble may appear in the lower-right corner of the screen. If it appears, click in the center of the bubble and enter your FAMNETID username and password when prompted. You will then need to click the "retry" button in the XpressConnect wizard.

8. Click "Done"

8. Congratulation you're now connected to Eduroam Network.

10. You can now browse the internet.
